

## Nystagmocatcher Price List 2026

**Euro excl VAT**

Nystagmocatcher is a medical technical MDR/CE certified optical device registered with the Swedish Medical Products Agency, approved for use within the EU. The product is intended to be used together with a mobile phone to make video recordings of eye movements in adults during dizziness episodes or attacks of dizziness.

The product has a long lifespan but the light source may need to be replaced from time to time, especially if the patient forgets to turn off the light after the examination. A separate eye shield per patient is recommended for hygienic reasons. Extra 3M eye patches can also be purchased via online pharmacies.
